

### PRODUCT INFO

**Construction tubes RR** are used together with locking slide units FM.R and KM.R for fast, easy, and frequent movement to previously defined positions along a square construction tube. Depending on the locking slide unit used, the tubes can be ordered with bores B or countersinking S.

Each bore position can be individually selected and indicated as an absolute dimension in the order key. The number of dimensional values ( $m_1, m_2, \dots$ ) corresponds to the number of bores. The minimum edge distance or hole distance is indicated in the table.

**RoHS-compliant product**

Material  
**WS**

AL	Aluminum
ED	Stainless steel • AISI 304

Square <b>S</b>	Length <b>l</b> ±0.5	<b>d</b> ±0.3 Bore B (for indexing plungers)	Countersunk S (for spring plungers)	Minimum hole distance <b>a</b>	Minimum edge distance <b>m<sub>1</sub></b>	<b>w</b>
V 25	available in all lengths from 100 to 2000 mm (in 1 mm steps)	B 5	S 2,5	10	25	2
V 30		B 5	S 2,5	10	25	2
V 40		B 8	S 4,5	16	38	3
V 50		B 8	S 4,5	16	38	3

Surface  
**O**

EL	(only for aluminum) • Anodized, natural colors
BL	(only for stainless steel) • Plain, untreated
